

I-HEAL QUALITATIVE EDUCATION SERIES

WITH DR. ASHOK KUMBAMU

1st Friday of every
month at 2pm EST.

1. Introduction to Qualitative Research

Develop a shared understanding of qualitative inquiry, its distinctions from quantitative approaches, and its value.

2. Philosophical Foundations & Research Paradigms

Explore how epistemology and paradigms like interpretivism and constructivism shape design and interpretation.

8. Data Management & Coding

Learn foundational techniques for preparing, coding, and organizing qualitative data.

9. Analysis, Interpretation & Rigor

Develop the ability to move from codes to themes while maintaining analytic rigor.

3. Research Design in Qualitative Inquiry

Learn how to formulate research questions, select appropriate methods, and align design with theoretical and ethical frameworks.

7. Audio & Visual Methods

Examine how audio, video, and visual tools expand qualitative inquiry and raise ethical considerations.

10. Writing & Presenting Qualitative Research

Develop ethical and effective strategies for writing and presenting findings with reflexivity.

4. Interviews as Method

Understand principles of conducting qualitative interviews and practice developing guides.

6. Observation & Fieldwork

Gain skills in ethnographic observation, reflexivity, and fieldnote writing.

5. Focus Groups & Group Dynamics

Explore strengths and limitations of focus groups and develop moderation strategies.
